| 21 | Janet       | Lis       | RN, BSN                        | Media        | Pennsylvania   | BSN, RN (inactive), JD. The safety of the size, contents and location of the planned Mariner East II pipeline have not been established. Neither has to safety track record of such pipelines. The plan to place this pipeline in populated areas such as in Delaware County should be reevaluated.   |
| 22 | Nicole      | Siter     | RN, BSN                        | Glen Mills   | Pennsylvania   | RN, BSN - The negative health & safety implications of this pipeline can not be overlooked. The potential danger to our communities is too great to proceed with the ME2 pipeline.  |
| 23 | Donna       | Rust      | RN, MSN, CRNP                  | MEDIA        | Pennsylvania   | RN, MSN, CRNP - It is gravely irresponsible to run a pipeline like Mariner East 2 through Delaware County. How is it possible that it has come this far without an analysis of the safely issues and the feasibility studies of adequate response to an emergency? This is uncharted territory and utterly and completely not worth the risk to the people of Pennsylvania and especially highly populated Delaware County. |
| 24 | Stefanie    | Gentile   | Home Health Service Provider   | Media        | Pennsylvania   | Invest in renewables not a dying fossil fuel industry trying to take their last stab at profits at the expense of our children's health + future.   |
| 25 | Lawrence    | Storniolo | Hospital Laboratory Specialist | Media        | Pennsylvania   | My 6 year old little girl attends Glenwood Elementary school which is only hundreds of feet away from this pipeline Why does big money get to roll through communities doing what ever they want to do Against the people's wishes that live their ? When does the corruption stop!   |
| 26 | Dr. Charles | Griffen   | OD                             | Exton        | Pennsylvania   |   |
| 27 | Diane       | Anderson  | DNP, MSN, RN, CNE              | Irwin        | Pennsylvania   | Dr. Diane Anderson, DNP, MSN, RN, CNE<br>These pipelines are a danger to our communities and the people that live in them.  |
| 28 | Jonathan    | Lee       | MD                             | Springfield  | Pennsylvania   |   |
| 29 | Michael     | Birkhoff  | MD                             | Glen Mills   | Pennsylvania   |   |
| 30 | Walter      | Tsou      | Medical Physician and Surgeon  | Philadelphia | Pennsylvania   | Too much potential for increasing fracking and fossil fuel burning for the planet to tolerate.  |

| 31 | Amanda     | Powell       | MSN, RN-BC                    | Gibsonia   | Pennsylvania   |  |
|    |            |              |                               |            |                | <p>I am a nurse, a mother, and a citizen, and I am signing this petition out of concern for the safety and very possibly the lives of those at such devastating risk posed by this pipeline for the sake of profits of a company with a poor safety record. They are clearly concerned only with their bottom line, I and so many others fighting hard or concerned for peoples well being. I think about what I would do in the event of an accident where people needed help. As both understand a mother its my instinct to help immediately. Its frightening to me to think that even at the distance that I am from the pipeline I may not be able to render assistance I may be a need of assistance myself. Governor, you and other legislators have family, children grandchildren, wives, husbands. Are you okay with putting them at risk 24/7 risk? Could you let your head on the pillow at night knowing that your or grandchild may be at school and the school could blow up? Or that they may just not come home one day because they could succomb to a lethal, odorless gas? I guess but can't be detected because they can't put a motor in in there because it would ruin the plastic products that it was eventually going overseas to make. At least the natural gas that warms our homes can be detected by smell, saving countess lives. This company has a proven track record of error please do not put our children, grandchildren, wives, husbands, ourselves in jeopardy for profit.</p> |

|    |            |              |                                       |            |                | <p>As a member of the community which will be impacted by the Mariner 2 East pipeline, I have significant concerns related to the safety of said pipeline. First, the loss of life in the event of a leak could be significant. It is my understanding that ,in the event of a leak, residents in the area of the leak must WALK to a safer area.</p> <p>A. Who and how is the pipeline monitored to detect a leak?<br/> B. How do disabled, elderly and handicapped people accomplish this?<br/> C. What impact studies have been done to answer evacuation issues?</p> <p>Second, the impact to the watershed and wild life would be devastating.</p> <p>A. What environmental impact studies have been done?<br/> B. How and by whom will native plants be replaced if the pipeline is ultimately completed?</p> <p>My personal thought is that the project is a financial windfall for the industry but devastating to private citizens and the fragile environment. Eminent domain which is being granted is not for private gain but for betterment of the communities. This test is not being met. The pipeline is too dangerous and too big a threat to those living in densely populated areas and too hazardous to the environment.</p> |
